EXPERIENCE

MYTEAM, Tashkent— *Junior Java Developer*

Nov 2023 – PRESENT

- Worked on a project with 1 million users and with backend of over 10 thousand of lines of code
- Collaborated with the development team to strategically re-engineer Java application code, yielding a remarkable 20% enhancement in application performance.
- Accomplished a 20% reduction in runtime errors, significantly enhancing overall system stability by strategically refactoring and optimizing the Java application codebase, thereby revitalizing the development workflow.

PROJECTS

Online Pharmacy – *Spring framework / PostgreSQL*

- Developed a location-based medicine purchasing application, enabling users to conveniently purchase pharmaceuticals from nearby sources.
- Achieved a 30% boost in Java application performance, enhancing system responsiveness and efficiency. Implemented optimized algorithms and strategic code refactoring techniques to drive impactful improvements in software performance.
- Diagnosed and resolved intricate code efficiency issues, resulting in a 15% reduction in server costs; implemented performance optimizations that improved response time by 25% and increased user satisfaction

LANGUAGES

- Uzbek - Native
- English - Intermediate

SKILLS

Languages: Java, HTML, CSS, JavaScript

Technologies: Spring, J2EE, MongoDB, PostgreSQL, Docker, Git, GitHub, Maven, Gradle, JUnit, Mockito

Concepts: Object Oriented Programming(OOP), MVC, RESTful API, Microservices, Continuous Integration/Continuous Deployment (CI/CD), SOLID

EDUCATION

PDP Academy
Location — Java Developer

Jan 2022- Dec 2023 - Computer Science - Uzbekistan
